

KYOWA PHARMA CHEMICAL CO., LTD.

We are pleased to meet you
at the CITE Japan 2019, Pacifico Yokohama,
from May 15 to 17th

We introduce “Effective Liposomes for cosmetics”, specialized for cosmetics formula. Our liposome “PANASOME™” is a high quality material that forms a multi-lamellar structure, and indicates a sharp particle size distribution. It retains the same structure in cosmetics too, flexibly contains each ingredient and improves skin penetration.

This year, our exhibition allows visitors to try the moist texture compatible with the skin, which is another characteristic of PANASOME™.

We offer contract manufacturing of PANASOME™ products and lined up products as well, which can be easily and promptly used.

- **Panasome™ Lutein** (*Blue Light Blocker / Other Benefits for Skincare*)

- **Panasome™ Plus** (*Empty Liposome/ Moisturizing Effect / Improvement of Permeability*)

We also exhibit our own unique material “PANADOXINE™ P”.

Almost skin problems are caused by exogenous factors (sun light, environmental pollutants etc.) and endogenous factors (aging, stress, fatigue etc.), and occur via inflammation reactions inside the skin cells in many cases.

Against them, “PANADOXINE™ P” contributes to keeping daily healthy skin with various support, such as inhibition of proinflammatory cytokines.

We will introduce you more about our latest activities!

Meet us at **D3-13** and benefit from our high-quality products and service!
